A+ Folder Locker Free

[Download](#)

A+ Folder Locker Download With Full Crack is a powerful tool that helps you create and manage secure vaults where you can add sensitive files and folders. You can use the tool to encrypt data as well as protect your personal information from unauthorized viewing, or to hide sensitive information in images to keep an eye on what other users are doing in the background. Create a new locker in order to secure and protect sensitive files and folders. You can decide to keep the files and folders as personal data, or add them into a predefined category (Personal or Work). You can pick the name, location and size of the locker, as well as set up passwords for safe access, so no one can open it. You can choose the compression level and encryption algorithm to encrypt the data. Besides, you can lock the application after a predefined number of minutes of keyboard and mouse inactivity, and prevent other users from playing around with the main settings. Protect your private files and folders You can make use of the program's encryption capabilities and encrypt your data, or create a password wallet and keep track of all

your passwords. With the utility, you can encrypt files and folders. Data concealer, password wallet and file shredder The app has a built-in file shredder that will help you delete sensitive information from your system. You can run the tool at Windows startup, password-protect the app to make sure other users don't make changes to your settings, create custom categories where you can keep track of your lockers, and run it in stealth mode. Features: Create a new locker You can choose the name, location and size of the locker. You can add it to a predefined category (Personal or Work). You can choose the compression level, as well as use the encryption algorithm and password for safe access. You can choose to protect the data or put it into a personal vault. You can choose a password wallet and keep track of all your passwords. You can lock the app after a predefined number of minutes of keyboard and mouse inactivity. You can run the application as a service at Windows startup to automatically start up when you logon. You can do it in stealth mode, so other users won't notice the app is running. Keep an eye on what other users are doing on your system You can have the app hidden in

the system tray and auto-shutdown when the device is idle
