YouTube Playlist Creator+ Full Crack is a lightweight and user-friendly piece of software that aims to offer you an easy solution to both manage your playlists and to download multiple videos, directly from their corresponding locations. Simple and intuitive interface

The utility comes with a stylish and intuitive interface that makes it well suited for all categories of users out there, including persons with a limited amount of experience with similar tools. The app's main window provides you with quick access to its two main features, namely the playlist creator and the playlist downloader. Effortlessly create YouTube playlists

With the help of app's playlist creator you can basically build, clone, merge and edit YouTube playlists. Getting to grips with this feature should not be hard, as you only need to click the “Paste URL” button to add videos directly to your playlist. But, before you can actually take advantage of this feature, you need to first log in using your YouTube account credentials. The second step requires you to navigate to Google Developer Console and create a new project. After

some additional steps, you need to generate a secret JSON file which needs to be downloaded, so that the app can help you create new playlists. For further details, we recommend you take a look at the app's online documentation. From this point onwards, you can drag and drop videos to re-order them in your playlist. To finish, simply click the “Create Playlist” button and instantly your newly created playlist is added to your YouTube account. Batch download videos from YouTube playlists in no time To get things started using the utility's other main feature, the playlist downloader, it is advisable that you first choose the destination folder for the output videos. Also, before you commit to downloading videos from any playlist, you need to choose their format and quality. The next step consists of simply copying the URL of the playlist, then press the “Paste URL” button on the app's main window. Once this is done, the program prompts you to save them all. While the downloader works well and it is quite fast, there is no denying that this app would benefit greatly from an option that would allow you to individually choose which videos you want to save. 7.0 January 28, 2019 Here you'll find
